

DISCIPLINA: Economia do Trabalho SIGLA: XX	CÓDIGO: XX
PROFESSOR: Valdemar Pinho Neto	CARGA HORÁRIA: 40h CRÉDITOS: 4
OBRIGATÓRIA: <input type="checkbox"/> SIM <input checked="" type="checkbox"/> NÃO	CURSO: <input type="checkbox"/> M <input type="checkbox"/> D <input checked="" type="checkbox"/> MD
PRÉ-REQUISITO: É importante que os alunos tenham concluído os cursos de Estatística e Econometria do primeiro ano do MD para o adequado acompanhamento do curso.	
ÁREA DE CONCENTRAÇÃO: Economia do Bem-Estar/Microeconometria Aplicada	
EMENTA <p>O curso oferece uma visão abrangente dos fundamentos e avanços recentes em Economia do Trabalho, com ênfase na aplicação de métodos econométricos modernos e amplamente utilizados em pesquisas relevantes da área. O currículo inclui leituras essenciais, que serão discutidas em sala de aula, além de referências complementares para aprofundamento nos temas específicos. O foco será em artigos que aplicam métodos de inferência causal, como Experimentos Aleatorizados Controlados (RCT), Diferenças em Diferenças (Diff-in-Diff), Estudos de Eventos, Variáveis Instrumentais (IV), Regressão com Descontinuidade (RDD), Controle Sintético (SCM) e Pareamento (Matching). Esses métodos são fundamentais para a análise de dados em econometria aplicada e serão utilizados de acordo com as especificidades das pesquisas e hipóteses investigadas. Mais especificamente, o curso explora aplicações econométricas modernas em temas como Capital Humano (educação, experiência, saúde, primeira infância, etc.), Mercado de Trabalho (auto-seleção, salário mínimo, monopsonio, firm premium, entre outros), diferenças raciais e de gênero, e desigualdade e mobilidade intergeracional e social. Além disso, serão discutidos tópicos emergentes que podem moldar o futuro do trabalho, incluindo inteligência artificial, imigração, mudanças climáticas e a influência de fatores políticos no mercado de trabalho. Mais detalhes sobre o curso podem ser encontrados abaixo.</p>	
OBJETIVOS <p>Tendo como foco a aplicação de métodos econométricos modernos em questões centrais de Economia do Trabalho, são três os principais objetivos: (1) discutir os tópicos fundamentais da área; (2) proporcionar diversas aplicações de métodos empíricos avançados na área; e (3) capacitar os alunos a aplicarem esses métodos de forma crítica e inovadora em suas próprias pesquisas. Para isso, ao longo do curso, os alunos serão expostos a artigos recentes e bem publicados na área, desenvolvendo as suas habilidades analíticas e uma boa compreensão dos principais temas e métodos discutidos. Os métodos econométricos serão introduzidos à medida que surgirem nos artigos apresentados, garantindo uma integração prática e contextualizada com a literatura contemporânea em Economia do Trabalho. A avaliação do curso será realizada por meio dos seguintes componentes: entrega de alguns resumos de artigos apresentados ao longo do curso, apresentações de artigos selecionados, replicação de um artigo de livre escolha pelos alunos (confirmado pelo professor) e, por fim, a entrega de um projeto de pesquisa aplicado demonstrando a capacidade de aplicação das ferramentas aprendidas durante o curso e em tema relacionado com os apresentados ao longo da disciplina. Esses elementos visam estimular a compreensão teórica e prática dos temas abordados, além de desenvolver habilidades de análise crítica e aplicação dos conceitos estudados.</p>
